

Web server with Python Package Flask

- Visit <https://projects.raspberrypi.org/en/projects/python-web-server-with-flask>
 - a. Complete the project except for the last page “What’s next?”
 - b. For the advanced challenge: The dynamic contents of your website are the local temperature and humidity readings.

For Lab Report/Presentation:

- No written report for this lab.
- Demonstrate/show the dynamic website on the web server.
